

## Forest School at Arlesdene Nursery School

Monday 14th January

Continue at home..

This week your child spent time building a sense of community with their peers, leaders, and Mother Nature.

They worked individually and as a team to create a nature web and pegged or weaved their found natural items together.

This helped them visualise the individual parts (themselves) becoming a whole (the group). They discussed what grows by itself and what is made by a person. This will help them consider the impact of discarding waste when playing and exploring in nature.

To continue this discussion at home, you could discuss with your child what it means to 'leave no trace' and how you could make an effort in your daily lives to use less man made materials, leaving less trace on the planet.
